About me

Motivated and detail-oriented Full Stack Web Developer with strong knowledge of both frontend and backend development. Skilled in building responsive user interfaces and integrating them with secure, scalable backend systems. Completed certified training from Future Leader Academy, where I developed real-world full stack projects. I am confident in my ability to learn quickly, adapt to team environments, and contribute to solving real-world problems through clean and efficient code. Looking for an opportunity where I can apply my technical skills, grow continuously, and add value to an innovative development team.

Experience

Full Stack Developer – Training & Certified

Future Leader Academy (<https://flacademy.in/>) – Remote / InPerson
Completed: May 2025

- Trained in complete web development from frontend to backend using industry tools and tech stack.
- Completed multiple real-world projects with deployment and API testing experience.

Part-Time Pharmacy Assistant

Local Pharmacy, Bhatkal 2022 – 2025

- Supported daily pharmacy operations, customer service, and inventory management.
- Gained multitasking, time management, and customer handling skills.

Projects

Car App Tech Stack

- Developed an interactive UI to list car models and details using dynamic REST API.
- Backend built using Java Spring Boot with MySQL integration.

Restaurant App Tech Stack

- Designed a menu-based restaurant application with item filtering and responsive layout.
- Connected frontend to backend for live data handling.

Product App Tech Stack

Created a full-stack product listing platform with category filtering and data updates.
